Office Action Summary	Application No. 10/595,958	Applicant(s) SEURAT GUIOCHET ET AL.	
	Examiner Reginald L. Alexander	Art Unit 3742	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2 and 10-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over prompt Niese in view of Tozer or Turner.

There is disclosed in Niese a lip gasket 6 designed to be mounted between a lid 3 and a bowl 12 of a pressure cooker, the gasket comprising first and second lips 4, 5.

Tozer and Turner disclose a sealing gasket wherein the gasket has a geometrical discontinuity (slit, opening, groove) on one or two of the lips provided with the gasket.

It would have been obvious to one skilled in the art to substitute the gasket of Niese with the gasket taught in Tozer or Turner, in order to provide an alternative sealing arrangement between the lid and bowl.

In regards to the discontinuity providing a path for putting an internal section of the gasket into communication with the outside if the lips are brought together, it is apparent that such function would be met if the gasket lips of either Tozer or Turner were brought together.

While both Tozer and Turner have their specific reason for providing a geometrical discontinuity to the lips of a gasket, it is clear the structural limitations of the claims have been met by the prior art.

Allowable Subject Matter

Claims 3-9 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Tweedale and Knight are cited for their disclosure of the state of the art.
